

INTRODUCTION TO QUARRYING

INTRODUCTION TO QUARRYING WORKSHOP

COURSE OVERVIEW

The **Introduction to Quarrying** workshop has been designed to provide participants with an introduction to the quarrying industry, including quarrying processes, products, people and positions.

The course will cover:

- The quarry life cycle
- Quarry products
- Quarry processes, plant and equipment
- Industry terminology
- The end use of quarries

Who should do the course?

The course is targeted at new employees in the industry or other related industries, quarry support roles, technical staff, sales staff and suppliers.

Learning objectives:

- Understand what a quarry is, and the different types of quarries
- Understand the products produced by quarries, and how they are used
- Understand quarrying processes and the equipment used
- Understand the organisation and management of a typical quarry, including job roles and qualifications required
- Understand the basic regulatory framework and the process for establishing quarries
- Understand community impact and influence

CPD hours: 3.5 hours - Technical Training. A completion certificate will be issued once finished.

Delivery and Duration

Delivery is via a half day workshop. The workshop can be delivered face to face or virtually via a platform such as Zoom.

Corporate booking: The IQA can arrange training for a corporate booking. If you would like to book delivery (either face to face or virtually) for your staff, please call the IQA on 02 9484 0577.

SUPPORTING EDUCATION MATERIAL

The IQA also offers a number of other courses to support knowledge of quarrying processes. Examples of these include:

- Quarry Products Technical Training
- Slope Stability
- Respirable Crystalline Silica
- Plant and Equipment: Safety, Compliance and Best Practice
